**Features that Excel**

On every door, warmth and beauty flourish with pine wood interiors, a perfect choice whether painting or staining.

Little or no exterior maintenance is required because each door is protected by extruded aluminum cladding, strong AND durable to the same time.

Cleat exterior is available in a wealth of tones and finishes. Choose from one of Quaker's 38 "Quick Pick" colors or choose a custom powder coat color for a truly cutting-edge look.

All hinged doors contain a multi-point locking system featuring a three-point system for genuine security.

Multisurface Low-E glass packages will augment your home's energy efficiency and also help carpet, rugs, flooring and furniture by repelling harmful U-V rays.

Extended panel ship edge sheds water away for enhanced protection.

Hinged doors are highlighted by anodized aluminum sills in a champagne color. Sliding doors possess Thermopane available in bronze or gray. All sills are made to withstand the rigors that come with frequent in-and-out activity.

Dual seal frame weather strip at panel face and edge improves air and thermal performance.

Screen feature BetterVue mesh for improved vision and protection.

Resilient ball-bearing rollers on sliding doors never give in to excessive use and are extremely simple to adjust.

Quaker's warranty is one of the industry's best.

---

**Options that Define**

Enhance energy performance with glass options.

Richen your door's aesthetics with wood panels (shown on right). Choose either the half or quarter panel design.

Any color in the rainbow is available on the aluminum clad exterior.

Grids. Multiple types. Multiple designs. Add them to help establish your home's style.

Simulated Divided Lites lend an air of elegance and antiquity.

Grids Between the Glass are dust-free, available in a flat or contoured shape, and can be single color or two-toned. White! Stained grids add beauty and can be removed quickly for easy cleaning.

Pre-finished white or primed interiors are always an availability. Ask about custom painted interiors.

Hardware finishes are available in many flavors (see back page).

Add a special twist to your interior with Alder Wood in place of pine.

For swinging doors, alternate between insect protection and an unimpeded view with our Retractable screen option. Use it when you need it. Hide it when you don't.

---

**Colors that Inspire**

White  Toffee  Smoke  Birch  Dark Bronze  Beige  Chestnut

Our 11 most popular colors are shown. Quaker has 38 other "Quick Pick" colors plus we have custom color capabilities too. This allows you to go beyond the normal limits of design. If you've got a color in mind, we can match it.

Due to printing limitations, colors shown may not accurately reflect actual paint color. Quaker does not assume any responsibility for any misrepresentations of our standard colors. Please call your authorized Quaker dealer for an actual color sample.
