With all of the modernization in today's construction industry, the purpose of a window and door screen still remains the same; *keep bugs out while the window is open.*

No screen mesh masters that singular task better than BetterVue™.

All of Quaker's operable vinyl windows and doors contain BetterVue™ screen mesh, considered to be the best overall screen available today.

Compared to similar meshes on the market, BetterVue™ mesh provides:

- * 10% more insect and pest control
- * 20% more optical clarity
- * 20% better airflow
- * A nearly translucent view
- * Improved light transmittance

A common screen mesh used in many window and door screens
